

Banana Technologies: Corporate Profile & Employee Handbook

Confidential | For Internal Use & HR Agent Training Only

Last Updated: October 2025

1. Company Overview

Banana Technologies is a global leader in "frugal innovation" and sustainable AI solutions. Founded in 2018, our mission is to peel back the layers of technological complexity to provide simple, nutritious software solutions for complex global problems.

- **Headquarters:** Pune, India (Global Tech Park).
 - **Regional Hubs:** San Francisco, London, Singapore.
 - **Industry:** Enterprise AI, Cloud Infrastructure, and Agrotech.
 - **Mission:** "To code a future where technology is as accessible and essential as fruit."
 - **Vision:** To become the world's most trusted partner in sustainable digital transformation by 2030.
-

2. Why Work With Us? (Employee Value Proposition)

Candidates often ask, "Why Banana?" Here are our key selling points:

1. **The "Green Code" Initiative:** We are a carbon-negative company. Every line of code we ship is optimized for energy efficiency.
 2. **Unpeeled Potential:** We have a flattened hierarchy. A Junior Dev's idea can become a flagship product if it solves a real problem.
 3. **Learning Stipend:** Every employee gets an annual budget of \$2,000 (or local equivalent) for upskilling, conferences, or certifications.
 4. **Wellness First:** We offer comprehensive mental health support, including mandatory "Digital Detox" days once a quarter.
-

3. Work Modes & Location Policies

Crucial Section for HR Agent: Candidates will frequently ask about flexibility.

Banana Technologies operates on a **"Role-Based Flexibility"** model. We do not believe in a one-size-fits-all approach.

A. Fully Remote (The "Nomad" Track)

- **Eligibility:** Engineering (Senior+), Content, Design, and Customer Support roles.
- **Policy:** Employees can work from anywhere within their hired country. International remote work is allowed for up to 90 days a year (visa permitting).
- **Stipend:** One-time Home Office Setup allowance of \$1,000.

B. Hybrid (The "Split" Track)

- **Eligibility:** Product Management, Junior Engineering, HR, and Sales.
- **Policy:** Employees are required to be in the office **2 days a week** (usually Tuesday and Thursday). The remaining 3 days are flexible.
- **Benefit:** Free lunch and commute reimbursement on in-office days.

C. Fully Onsite (The "Hub" Track)

- **Eligibility:** Hardware R&D, Data Center Operations, and Security teams.
- **Policy:** 5 days a week at the office due to access to specialized equipment (The "Banana Lab").
- **Benefit:** Premium shift allowances, dedicated relaxation zones, and higher annual bonus percentage (15% vs standard 10%).

4. Key Policies & Benefits

Leave Policy (Annual)

Leave Type	Days	Notes
Privilege/Earned	21	Can be carried forward (max 45 days).
Sick/Casual	12	No medical certificate needed for < 2 days.
Wellness Days	4	Quarterly mandatory days off for mental health.
Parental Leave	26 Weeks	Primary Caregiver (fully paid).
Partner Leave	4 Weeks	Secondary Caregiver (fully paid).

Equipment Policy (BYOD vs. Company Issued)

- **Standard Issue:** All employees receive a MacBook Pro (M-Series) or Dell XPS, plus a 27-inch 4K monitor.
- **BYOD:** Not permitted for Engineering/Security roles due to IP protection protocols.

Performance Reviews

- Reviews happen **bi-annually** (June and December).
- We use a "360-degree feedback" mechanism.
- Promotions are merit-based, not tenure-based.

5. Current Flagship Projects

Use this data when candidates ask, "What kind of work will I be doing?"

Project "Yellow Stone" (AI & Cloud)

- **Description:** An AI-driven cloud optimization tool that reduces server costs by predicting traffic spikes with 99.9% accuracy.
- **Tech Stack:** Python, Kubernetes, TensorFlow, AWS.
- **Status:** In Production (Version 2.0).

Project "Potassium" (AgroTech)

- **Description:** IoT sensors for vertical farming that monitor soil nutrient levels and automate hydration.
- **Tech Stack:** C++, Embedded C, Rust, Azure IoT Hub.
- **Status:** Beta Testing in European markets.

Project "Peel" (Cybersecurity)

- **Description:** A zero-trust security framework designed for fintech startups. It "peels" away malicious traffic layers before they hit the core database.
 - **Tech Stack:** GoLang, Blockchain, React (Dashboard).
 - **Status:** R&D Phase.
-

6. Hiring Process Overview

1. **Screening:** Resume review by AI + HR.
2. **Technical Round:** 60-minute coding/domain challenge (Focus on logic, not syntax memorization).
3. **Culture Fit:** "The Banana Split" interview – a casual chat with cross-functional team members to assess values alignment.
4. **Offer:** Rolled out within 48 hours of final selection.
